# KEYSTONE "MOVIEGR

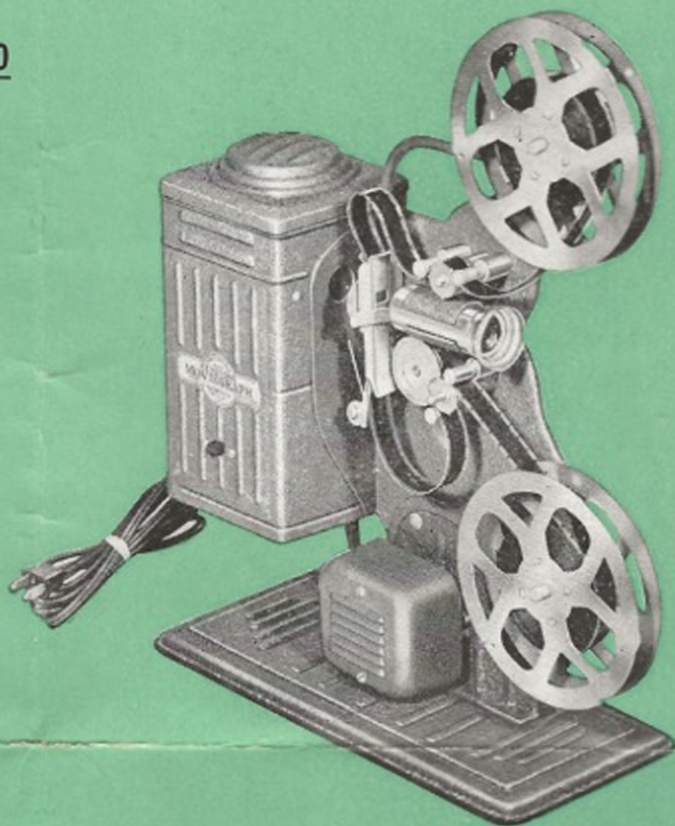

For over a quarter of a century Keystone Moviegraphs have been the leading line of juvenile motion picture projectors, primarily intended for the juvenile trade.

It is important to you as a photographic goods dealer that Toy Projectors be offered to the youngster to start him off as a potential enthusiast for movie cameras and regular projectors, the same as you may wish to start him off on a box camera.

His requirements for movie films will bring him back to your store the same as on roll film.

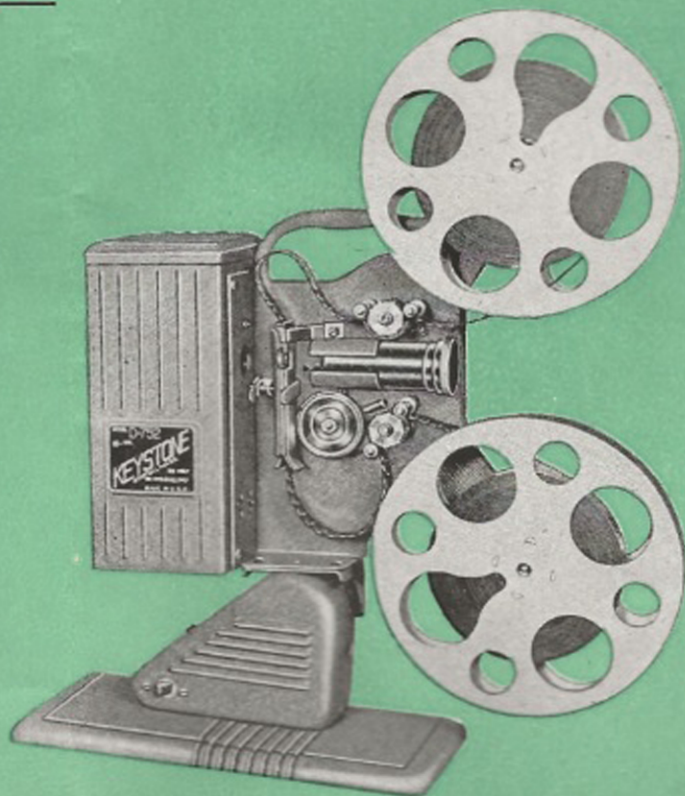

## MODEL E-743 16 mm Retail Price \$17.50

Good for the young beginner. Easy to operate. Shows clear steady pictures. Equipped with A.C. motor with switch — bell shaped focusing lens — condenser lens — 120 watt concentrated filament bulb — motor rewind. Tilts for angle projection. Spring retainer prevents loss of belts. 400 ft. film capacity. One 200 ft. reel furnished. Weight 9 lbs. Packed individually.

## MODEL D-752 16 mm Retail Price \$23.50

An excellent buy in the low-priced range. Equipped with A.C. motor with switch — tubular 140 watt projection lamp — condenser lens — reflector — spring belt retainer. One 400 ft. reel furnished. Die cast body. Weight 9 lbs. 3 oz. Packed individually.

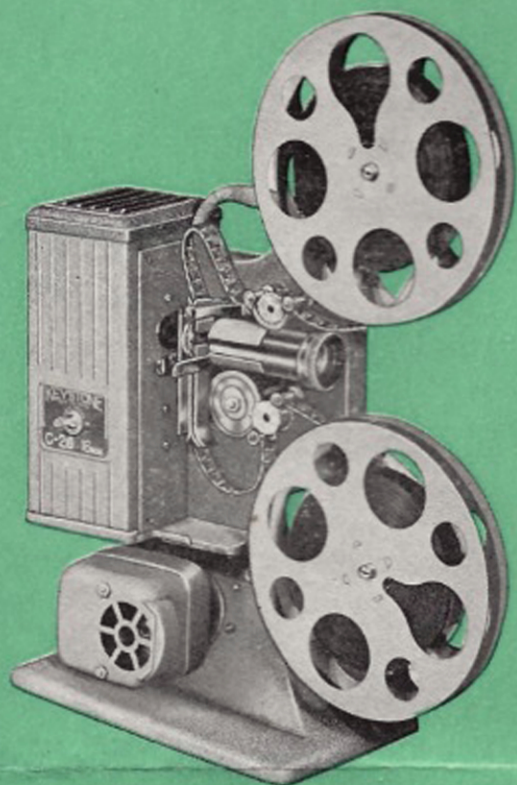

# APHS" 8 AND 16 MM

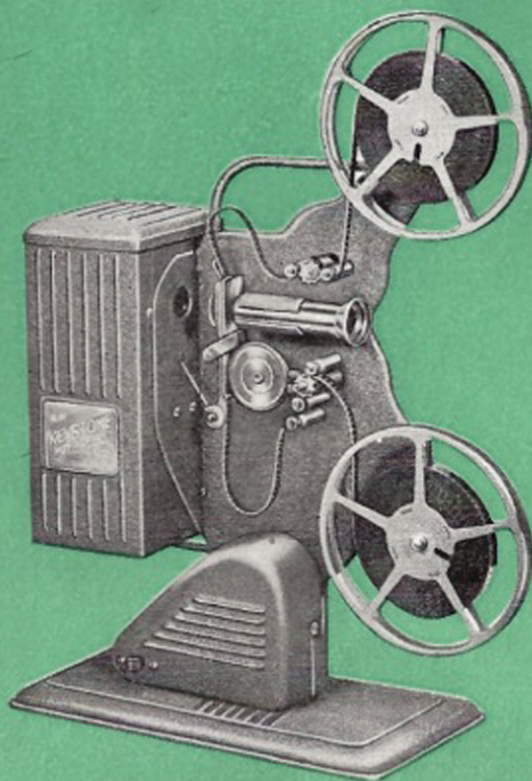

Parts on Keystone Toy Projectors have the same careful inspection as high priced equipment, every projector thoroughly tested before leaving the factory and guaranteed to work correctly.

16mm Projectors will show larger pictures than 8mm. The cost of film for the 8mm is less but the size of the picture would be about half at the same distance.

**MODEL C-26 16 mm Retail Price \$32.75**

A top quality product in the toy projector field. Has many fine features similar to expensive adult equipment. Brilliant 200 watt lamp with separate switch — f2.8 projection lens — 115 volt 60 cycle A.C. motor — forced draft ventilation — highly efficient condenser lens system — double blade barrel shutter — electric film rewind — manual framer — simplified threading — die cast body and cast base. 400 ft. reel furnished. Weight 14 lbs. 10 oz. Packed individually.

**MODEL 883 8 mm Retail Price \$21.85**

Top quality toy projector provides up to 30-minute shows, using low-cost 8mm films. Has A.C. motor with switch — spring belt retainer — bell shaped lens — condenser lens — 120 watt concentrated filament bulb — motor rewind. Tilts for angle projection. 400 ft. film capacity, one 200 ft. reel furnished. Weight 9 lbs. Packed individually.
