

MOVIE FILMS FOR THE PEAK 16mm HOME CINEMA

(First Release)

106 different 16mm FILMETTE titles (Each Subject 2ft. approx.)

HOW TO USE

PROJECTOR Connect projector leads to any 4.5 volts battery, or to mains THROUGH a TRANSFORMER. Slip film-Loop in gate and you are ready to show. For "still" projection leave handle in correct frame position, (the film will not burn). The Peak projector is TWO projectors in one, MOVIE and "STILLS" and is COMPLETELY SAFE.

FILMS To make a continuous film-loop join the two ends with SELLOTAPE leaving PERFORATED SPROCKET holes free. To make longer film-loops join end to end — any of the Peak titles — in the same way. YOU'LL LOVE THESE FILMS.

ALL 16mm FILMS ARE NON-INFLAMMABLE
