

**INSTALLATION
OF
TRANSFORMER
& CORD
IN THE
VIEW-MASTER
LIGHT
ATTACHMENT**

Do It the Easy Way . . .

Read These Instructions

1. Detach View-Master Stereoscope and pull out batteries from the Light Attachment.
2. If hole (A) is not already punched out, punch out with a pencil point.
3. Thread cord tips (B) through hole (A) from back.
4. Push cord tips all the way into holes in electrical contacts (C). Press down contacts for easy insertion of tips.
5. Re-assemble without batteries. Attach View-Master Stereoscope.
6. Plug in transformer unit (D).

The View-Master Transformer & Cord Unit is tested for 115 volt, 60 cycle, ALTERNATING CURRENT. Do NOT use in Direct Current.
